

DEPLOYMENT OF APP IN IBM CLOUD

Deploy in Kubernetes Cluster

Team ID: PNT2022TMID35176

Project Name: PLASMA DONOR APPLICATION

The screenshot shows the Docker Desktop application window. The left sidebar contains navigation options: Containers, Images, Volumes, Dev Environments (marked BETA), Extensions (marked BETA), and Add Extensions. The main panel displays the logs for a container named 'gallant_bhabha' with the command 'docker/getting-started'. The logs show a series of HTTP GET requests to various assets and fonts, all returning 200 status codes. The bottom status bar indicates 'RAM 1.60GB', 'CPU 0.27%', and 'Connected to Hub'.

Containers Give Feedback

A container packages up code and its dependencies so the application runs quickly and reliably from one computing environment to another. [Learn more](#)
